3 - 2010 I.F. & A.U. Registered Champions

IF 06 WTCM 1994 BB H “TAR BABY”

TAR BABY so named because she came home loaded with Tar and many of her feathers had to be stripped and molted as a result she lost 1 1/2 seasons and still she earned a great record. I often wonder how great a record she could have earned if she had not lost so much time. She has earned 7 CJC diplomas no worse than 55th against an average of 2500 birds, 4 in the top 28. Much of her success was earned as a three year old. She is a fantastic full bodied hen with muscle and strength to spare. When in racing form she exudes a robustness about her that very few carry. She is a daughter of AU champion NITRO. NITRO was retired after just one YB and one OB season from racing in 2005. I felt he would be more valued as a breeder. My hunch was correct. Tar Baby is a sister to several winners and some very special breeders. She is a gr. daughter of the great “ROUGE” My foundation cock and a gr. daughter of the famous “LOLITA” two of my most valued foundation birds of today’s family. She is truly a genetic fountain of prepotency and champion caliber performance on both sides of the pedigree! Several of her brothers and sisters are also producing some super racers. To date she has been a racer not a breeder. I am sure that when I move her to the breeding team she will produce those fantastic results as well.

AU 07 TOR 7003 Bchwft H “LA MARIPOSA”

La Mariposa (the butterfly) so called due to a bad habit of fluttering around before actually landing. She developed it as youngster and it cost her a couple of wins. Every once in a while a truly super pigeon comes along that just sets the bar a bit higher. Mariposa is such an athlete! She is a daughter of the BOOMER and THE WALLFLOWER. They are known as THE SUPER 30 PAIR that makes her a gr. daughter & gr. gr. daughter of the great “ROUGE” This makes her sister of many winners including AU champion, LEGACY, and other great champion racers and breeders. She herself has earned 9 CJC diplomas 8 of them no worse than 49th & 6 in the top 30 positions with an average of 2500 birds competing.

Deb-Ray Torres Loft (continued)

MARIPOSA is exciting because she further proves that genetic in-breeding or line breeding and high level performance are attainable with the right family! The key is not just the breeding but the testing and confirmation that the winning ability continues to be passed on within the family. When this occurs success is inevitable. Like many of her family when in form she feels like cork in the hand with a feather texture that is absolutely beautiful. She is an average size girl that due to her record is a giant in the loft.

AU 07 TOR 7003

AU 06 TOR 6070 BBH "ORGASM"

Orgasm was retired after her 2008 season. After winning 5 races and scoring 5 times in the top 15 in the CJC against an average of 2500 birds in those races. She is now a new member of the breeding team. Her lineage goes back to my old original Janssen line the Theo Hartogs, Janssens including Viejo, sire of 21 individual winners and some great breeders. This bloodline has been winning for over 30 years.

ORGASM was so named when a friend handled her and he quoted "handling her is better than sex it's like an orgasm". I don't know if I agree but the name stuck. However, many have handled this great girl and unanimously agree that she is quality like few others. She is a full bodied girl with soft muscle yet in racing form she carried strength but no volume. She is also aggressive. When she claims a perch or a box, intruders beware because she will not only throw them out she will chase them for a while. That is the spirit that she inherited as VIEJO acted the same way.
